Resume

The Lighthouse report gives us scores for various aspects of your website's performance: 1. Performance score: 85/100 - This means

that your website loads faster than about 85% of websites, but there is still room for improvement to make it load even quicker. 2. Accessibility score: 87/100 - This indicates that your website is more accessible to people with disabilities compared to around 87% of other sites. However, there are still some areas where improvements can be made to ensure an optimal experience for everyone. 3. SEO (Search Engine Optimization) score: 63/100 - The SEO score shows how well your website is optimized for search engines like Google. With a score of 63, it means that there are several areas where improvements can be made to help your site rank higher in search results and reach more people online. 4. Best practices score: 100/100 - This indicates that your website follows all the recommended best practices for web development. This is great news, as it ensures that your site performs consistently across different devices and browsers! Overall, these scores suggest that while there are some areas for improvement, your website is generally well-optimized and accessible, with a good performance level. It's always important to continue making improvements to ensure the best possible experience for your users!
