## Resume

1. **\*\*Performance\*\***: The website's current performance score is 16 out of 100. This means that the site could be loading significantly

slower than optimal, which can negatively impact user experience and search engine rankings.

Suggestions: Optimize images, minify CSS and JavaScript files, enable browser caching, and reduce server response time.

2. **\*\*Accessibility\*\***: The website's accessibility score is 78 out of 100. This suggests that while the site is generally accessible to a wide audience, there may be areas that could be improved for better usability by people with disabilities.

Suggestions: Ensure images have descriptive alt text, provide captions and transcripts for multimedia content, make sure all interactive elements are keyboard-accessible, and improve color contrast for readability.

3. **\*\*SEO\*\***: The website's SEO score is 40 out of 100. This indicates that there may be issues preventing the site from ranking as well as it could in search engine results, potentially affecting its visibility to users.

Suggestions: Optimize title tags and meta descriptions, use header tags appropriately, ensure URLs are descriptive and SEO-friendly, and create engaging content regularly.

4. **\*\*Best Practices\*\***: The website's best practices score is 79 out of 100. This suggests that the site generally adheres to modern web development standards, but there may be opportunities for improvement.

Suggestions: Ensure consistent naming conventions for HTML elements and CSS classes, use semantic HTML elements where appropriate, and avoid using deprecated features or techniques.
