## Resume

The Lighthouse report shows the following results: - Performance: 52 (out of 100): This means that your website's loading speed and

responsiveness could be improved to offer a smoother experience for users. - Accessibility: 89 (out of 100): Most parts of your website are accessible, but there is still room for improvement in ensuring that everyone, including those with disabilities, can easily use and understand the content on your site. - SEO: 63 (out of 100): This score indicates that there is room for optimization to help search engines better understand the content on your website and improve its visibility in search results. - Best practices: 100 (out of 100): Your website follows all recommended best practices, ensuring it functions correctly and offers a good user experience. In summary, there is potential for improvement in terms of performance, accessibility, and SEO on your website to provide an even better user experience and make it more discoverable by search engines. The good news is that your site already follows all recommended best practices!
