Resume

The report shows the performance of your website scored 28 out of 100, which means it takes longer than ideal to load. This can affect

the user experience as pages may take a while to appear. On the positive side, your website scores 78 out of 100 for accessibility, which suggests that most users should find it easy to navigate and use. For SEO (Search Engine Optimization), the score is 40 out of 100, indicating there's room for improvement to help search engines better understand your website content so they can rank it more effectively in search results. Lastly, your site scores 79 out of 100 for best practices, which means it follows many established web development guidelines that improve its overall quality and stability. In summary, there's room to improve the speed of your website, increase SEO performance, but the site is largely user-friendly and well-built in terms of best practices.
