Resume

The Lighthouse report indicates that the performance of your website could be improved, with a score of 56 out of 100. This means that

some adjustments are needed to make your site load faster and run more smoothly. On the positive side, the accessibility score is high at 95 out of 100, which shows that your website is generally user-friendly for people with various abilities. In terms of SEO (Search Engine Optimization), there's room for improvement, with a score of 63 out of 100. This means that some changes might be needed to help search engines better understand and rank your site in search results. Lastly, the best practices score is strong at 96 out of 100, which suggests that your website follows many industry standards and guidelines. In summary, it's essential to focus on improving the performance of your website while maintaining good accessibility and SEO practices to ensure a better user experience and higher search engine rankings.
