Resume

The Lighthouse report evaluates your website's performance, accessibility, SEO (Search Engine Optimization), and best practices.

Here are the scores: 1. Performance: 14/100 - This indicates that there is room for improvement in how fast your site loads and responds to user interactions. 2. Accessibility: 82/100 - Your website's accessibility, or its ability to be easily used by people with disabilities, is generally good but could be better. 3. SEO: 50/100 - There are areas where your website can be optimized for search engines to help improve its visibility and ranking on search engine results pages. 4. Best practices: 82/100 - Your site follows most of the industry best practices, but there are still opportunities to make it more efficient, secure, and user-friendly. In summary, there is potential for improvement in the performance, SEO, and accessibility aspects of your website to provide a better experience for users and potentially increase its visibility online.
