

Simplified report - Audit Lighthouse

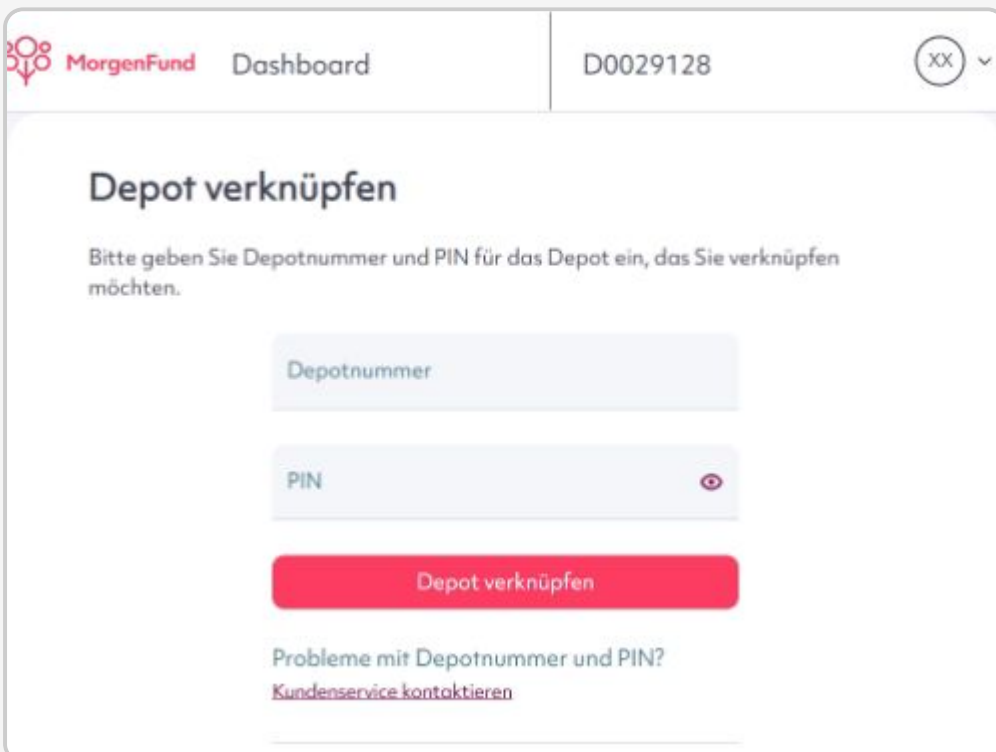

● Performance : 41/100

● Accessibility : 84/100

● SEO : 63/100

● Best practices : 100/100

Screenshot of the page

The screenshot shows a web interface for 'MorgenFund'. The top navigation bar includes the logo, the word 'Dashboard', and a user identifier 'D0029128' with a dropdown arrow. The main content area is titled 'Depot verknüpfen' (Link Depot). Below the title, there is a instruction: 'Bitte geben Sie Depotnummer und PIN für das Depot ein, das Sie verknüpfen möchten.' (Please enter the depot number and PIN for the depot you want to link). There are two input fields: 'Depotnummer' and 'PIN'. The 'PIN' field has a toggle icon to show or hide the input. Below the input fields is a red button labeled 'Depot verknüpfen'. At the bottom, there is a link: 'Probleme mit Depotnummer und PIN? Kundenservice kontaktieren'.

Resume

The Lighthouse report provides insights into your website's performance, accessibility, SEO, and best practices. Here's a

summary: Performance: Your website received a score of 41 out of 100, suggesting there is room for improvement in how quickly your site loads and responds to user interactions. This can affect the overall user experience on your site. Accessibility: You achieved an accessibility score of 84 out of 100, which means most people will be able to use and understand your website easily. However, there might still be some areas that could be improved to make it more accessible for all users, including those with disabilities. SEO (Search Engine Optimization): Your site earned a score of 63 out of 100 in this category. This indicates that search engines may find it somewhat challenging to understand the content and structure of your website. By improving SEO, you can help increase the visibility of your website in search results. Best practices: You did well in following best practices, scoring a perfect 100 out of 100. This means your site adheres to web development guidelines recommended by industry experts, ensuring that it functions properly and offers a good user experience. To summarize, your website performs reasonably well in terms of best practices but can benefit from improvements in performance, accessibility, and SEO. By addressing these areas, you'll be able to create a more enjoyable user experience for visitors while also making it easier for search engines to understand and rank your site.
