Resume

Performance: The score for the performance of your website is 2 out of 100. This indicates that your site may be slow to load, which

can negatively impact user experience and search engine rankings. To improve this score, optimize images, minify CSS and JavaScript files, and leverage browser caching.

Accessibility: Your website received an accessibility score of 86 out of 100. This means that while there are some areas for improvement, your site is generally accessible to users with disabilities. To enhance accessibility further, make sure all images have descriptive alt text, ensure the site can be navigated using only a keyboard, and provide captions or transcripts for video content.

SEO: The SEO score of your website is 63 out of 100. This suggests that there are opportunities to improve your site's search engine rankings. Some ways to boost your SEO include optimizing title tags, meta descriptions, and header tags, and using relevant keywords throughout the content.

Best Practices: Your website received a best practices score of 96 out of 100. This indicates that your site follows most web development best practices, which can help ensure a consistent user experience across different devices and browsers. To maintain this high score, continue to keep your content up-to-date, fix any broken links, and ensure that the website is secure by implementing HTTPS.
